D-CYFOR

Methodology:

The survey was conducted online among 1000 U.S. registered voters aged 18+ between February 22nd – 23rd, 2019 using stratified sampling. Respondents were selected to be representative of registered voters living in the U.S. based on gender, age, ethnicity, and census region.

The final survey data was weighted by gender, age, ethnicity, census region and 2016 Presidential vote.

All questions appear in the order in which they were shown to respondents. The final computer tables show weighted crosstab data for the following variables: gender, age, ethnicity, census region and 2016 Presidential vote.

Where a question is asked to a subset of the original total sample of 1000 registered voters, the new sample size is listed below the question.

The survey has a margin of error of 3.1% at the 95% confidence level. The margin of error within specific demographics (crosstabs) is significantly higher due to the smaller sample size. Due to the effects of rounding some figures may not equal 100%.

Table of contents:

Q1: If the election for Congress were held today, would you vote for the Republican from your District or the Democrat from your District?

Sample Size: 1000 Registered Voters

	Total	Gender		Age					Ethnicity				Census Region				2016 Presidential Vote
