

US PRESIDENTIAL ELECTIONS & DEMOCRATIC PRIMARIES: NEW HAMPSHIRE

Feb 8 – Feb 10 2020

EMBARGOED FOR RELEASE UNTIL:
Monday, February 10 at 4:00pm EST

Methodology & Sample Profile

This study was conducted by AtlasIntel, an independent research & data intelligence firm.

1100 random interviews of New Hampshire registered voters were conducted online between February 8 and February 10 2020. The sample was post-stratified with propensity scores to match the profile of registered voters on the following variables: gender, region, age group, education, family income, race, and vote in the 2016 Presidential Elections. The margin of error for registered voters is +/-3% at the 95% confidence level. The margin of error for likely Democratic primary voters is +/-5% at the 95% confidence level. 431 voters declared that they would be voting in the Democratic Primary.

State-level results are representative of registered voters. Democratic primary results are provided for likely voters. Some percentages do not add up to 100% due to rounding.

7 questions are not reported in this public report.
