

US PRESIDENTIAL ELECTIONS & DEMOCRATIC PRIMARIES: TEXAS

Feb 24 – Mar 02 2020

EMBARGOED FOR RELEASE UNTIL:

Monday, March 2 at 5pm EST

Methodology & Sample Profile

This study was conducted by AtlasIntel, an independent research & data intelligence firm.

1100 random interviews of Texas registered voters were conducted online between February 24 and March 2 2020. The sample was post-stratified with propensity scores to match the profile of registered voters on the following variables: gender, region, age group, education, family income, race, and vote in the 2016 Presidential Elections. The margin of error for registered voters is +/-3% at the 95% confidence level. The margin of error for likely Democratic Primary voters is +/-4% at the 95% confidence level. 486 voters declared that they would be voting in the Texas Democratic Primary.

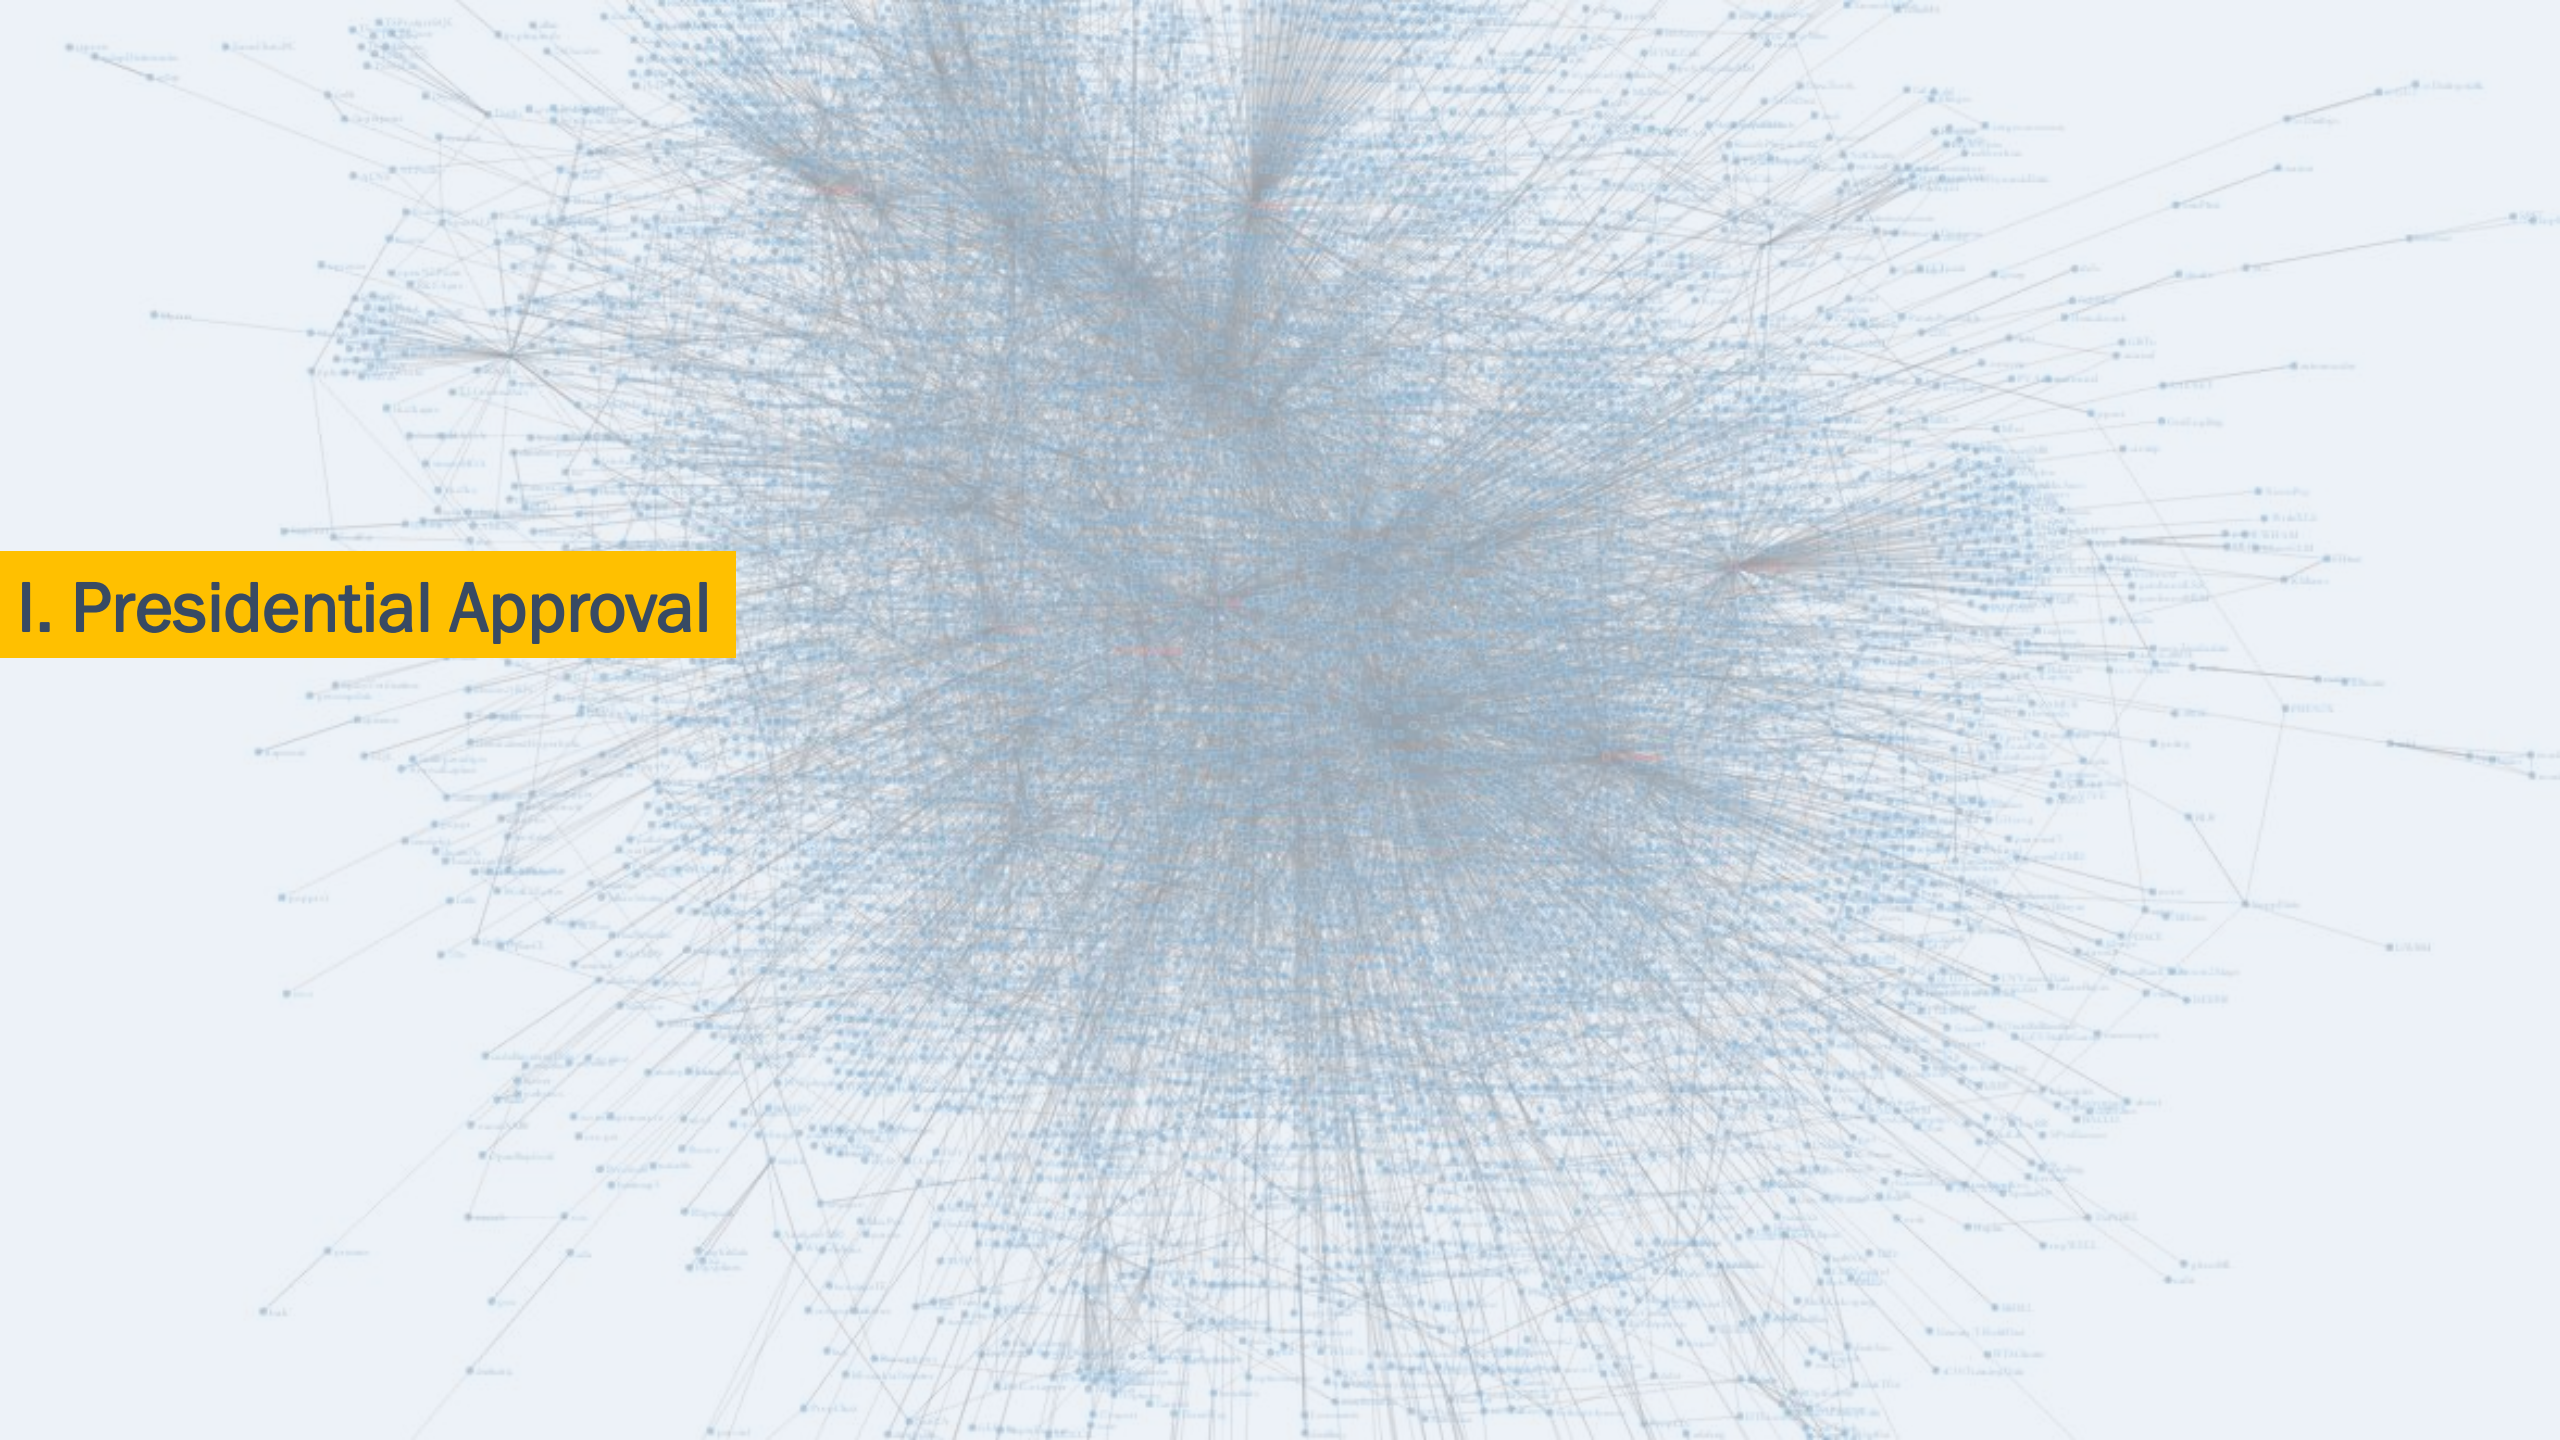

State-level results are representative of registered voters. Democratic Primary results are provided for likely voters. Some percentages do not add up to 100% due to rounding.

8 questions are not reported in this public report.
