Premise Poll: Bi-Weekly Political Sentiment Tracker (May 15)

These results are based on responses from 2,042 Americans collected between May 12th and May 15th via the Premise smartphone application. Premise used stratified sampling of its opt-in panel members, along with post stratification weighting based on the American Community Survey to provide a representative sample. These results are weighted by Age, Gender, Region, and Education.

Premise Poll: Bi-Weekly Political Sentiment Tracker (May 15)

These results are based on responses from 2,042 Americans collected between May 12th and May 15th via the Premise smartphone application. Premise used stratified sampling of its opt-in panel members, along with post stratification weighting based on the American Community Survey to provide a representative sample. These results are weighted by Age, Gender, Region, and Education.

These results are based on responses from 2,042 Americans collected between May 12th and May 15th via the Premise smartphone application. Premise used stratified sampling of its opt-in panel members, along with post stratification weighting based on the American Community Survey to provide a representative sample. These results are weighted by Age, Gender, Region, and Education.
