

These results are based on responses from 1,850 Americans collected between October 11 and October 16, 2023, via the Premise smartphone application. The results for candidate preferences are reported for all respondents in the sample, including 1,417 respondents who self-identified registered voters. The results on current events are for all 1,850 Premise respondents in this sample. Sample sizes may vary depending on knowledge or awareness of current events vary based on knowledge of the events. Premise used stratified sampling of its opt-in panel members, along with post-stratification weighting based on the American Community Survey, to provide a representative sample. These results are weighted by Region, Gender, Age and Education.

These results are based on responses from 1,850 Americans collected between October 11 and October 16, 2023, via the Premise smartphone application. The results for candidate preferences are reported for all respondents in the sample; including 1,417 respondents who self-identified registered voters. The results on current events are for all 1,850 Premise respondents in this sample. Sample sizes may vary depending on knowledge or awareness of current events vary based on knowledge of the events. Premise used stratified sampling of its opt-in panel members, along with post-stratification weighting based on the American Community Survey, to provide a representative sample. These results are weighted by Region, Gender, Age and Education.
